Why wood & glass

Directions for choosing the correct dimensions for your wardrobe

1. Select the above dimensions of the wardrobe to fit as close as possible to your opening
2. From the dimensions you choose, leave 1-1.5 cm perimeter of wall-to-wall opening so that you can easily insert the assembled pieces of the wardrobe into the opening.
3. If it is longer than 2 cm, use a grout glue to close the gap (grouting).
4. If it is longer than 2-3 cm perimeter, choose to buy a filler (that is, a wood of 280 cm length and width 5 or 10 or 15 or 20 or 25 or 30 cm) which can be cut in the height you need. You can order it separately in the color of your doors or any other color you prefer.

Caution: the filler should be installed by you or your installer. Alternatively, you can send us the exact dimensions at a small fee so that we can cut it for you in order to easily install it.

5. Finally, if you want to enrich your wardrobe, you can buy accessories such as drawers, shelves, hangers, etc. (Be careful to select the right width - in the wardrobe you have already selected).

Anyway, do not worry !!! Your order is checked by the order department and if an error occurs, within three business days, a confirmation email will be sent to you or someone will contact you to confirm your items and your choices. In all other cases, if everything seems to match, a confirmation email will be sent to you,.

How we work

Way 1

Step 1:

Send us a sketch of your rooms with all the dimensions and the heights. Don't worry if it is not a professional plan, just measure correctly and it is fine with us.

Step 2:

Give us a clue of what you are thinking of – a small description of each room

Step 3:

For better results please send us some pictures of each room in order to suggest to you the right colors and designs.

Step 4:

Let us know about your available budget

Step 5:

In 4 working days (Monday – Friday) according to your pre-order, our technical department will make 3D designs free of charge - based on the data you sent us. If we have any further questions we will contact you via email or phone, so please do not forget to provide us both.

Step 6:

We will send you the plans for approval with our quotation. During this procedure we will contact you and help you with the plans.

How we work

Way 2

If you really want to design the kitchen and closet of your dreams and be part of it, choose this way!

Step 1: Choose from our catalogue all the pieces you need.

Step 2: Then write them down to our pre-order form and send it to us.

Step 3: We will take your pre-order and we will check each piece separately and double check everything for you! Free of charge!

Step 4: Our technical department will make 3D designs of each wall of your home based on your pre-order. During this procedure we will check your plan for any technical problem. Based on the pieces you chose we will create the corresponding 3D designs. If we notice that there are any deficiencies in your pre-order in relation to the dimensions of your walls, we will contact you to confirm the right dimensions.

Step 5: In 3 working days (Monday – Friday) according to your pre-order, our technical department will make 3D designs free of charge - based on the data you sent us. If we have any further questions we will contact you via email or phone, so please do not forget to provide us both.

Step 6: You will have our quotation.

How we work

Way 3

Step 1:

If you already know how we work you can use our final order form and send your preferable pieces.

Once you fill the order form it is very important to remember that this stage is final and the process is on the go.

Step 2:

In 3 working days (Monday – Friday) according to your order, our technical department will make 3D designs free of charge - based on the data you sent us. If we have any further questions we will contact you via email or phone, so please do not forget to provide us both.

Step 3:

We will send you the plans for approval with our final quotation. During this procedure we will contact you and help you with your plans.
